

TINY'S #5

West University Place

It lies in an almost-impossibly leafy neighborhood in Houston. Schools and parks everywhere. But it's not really Houston, no. This is a city that was named, apparently, after a street.

Inside Tiny's it's all light and wicker and stressed wood. It's very proper, but comfortable. The service is wonderful. The chocolate chip cookies are out of this world. Breakfast and lunch only. Wine and beer only. And the only Texas booze in the house: Shiner Bock.

That works for me. The name of this city, though, that's still up for debate. West University Place is two square miles in southwest Houston. Maybe they should have called the city "Tiny's".
